- Java
- HTML
- CSS
- Tailwind-CSS
- JavaScript
- Node.js
- React.js
- Express.js
- MongoDB
- MySQL
- Git
- Github
- Postman

LANGUAGES

- Hindi
- English

PROJECT

Postify   https://postify-six.vercel.app

I have created a web application that functions as a social media platform, offering intuitive features such as signup, login, post sharing, liking, commenting, and establishing friend connections. To enhance security, I've implemented robust password management systems and enabled users to delete their accounts securely. Additionally, I've placed a strong emphasis on user experience, integrating features like dark mode, notifications, activity tracking, and customizable profiles. Ensuring platform safety is paramount, so I've included privacy settings for users and incorporated a post reporting system.

Tech stack used for development:

- React.js for UI development.
- Tailwind-CSS for styling.
- Express.js for creating APIs.
- MongoDB for data storage.
- Mongoose for Object Data Modeling (ODM).
- Nodemailer for sending email.
- Cloudinary for photo storage.
